Eco Block India

Turning Plastic Waste into Sustainable Construction Materials

Founder: Imtiyaz Khan

Problem

- Plastic waste pollutes villages and cities.
- Low recycling rates.
- Need affordable, sustainable building materials.

Solution

- Collect, sort and recycle plastic into paving blocks, plastic boards and infrastructure products.

Innovation

- Village collection network.
- Community participation.
- Circular economy.
- Local jobs.

Market & Customers

- Customers: Municipalities, builders, contractors, schools, farms.
- Business Model: B2B, B2G, B2C.

Vision

- Build a cleaner India by converting plastic waste into valuable products while creating employment.
