SECURA

YOUR SAFETY. OUR PRIORITY.

Presented by: Antarjita Chakraborty and Rimsha Khan

Problem Statement

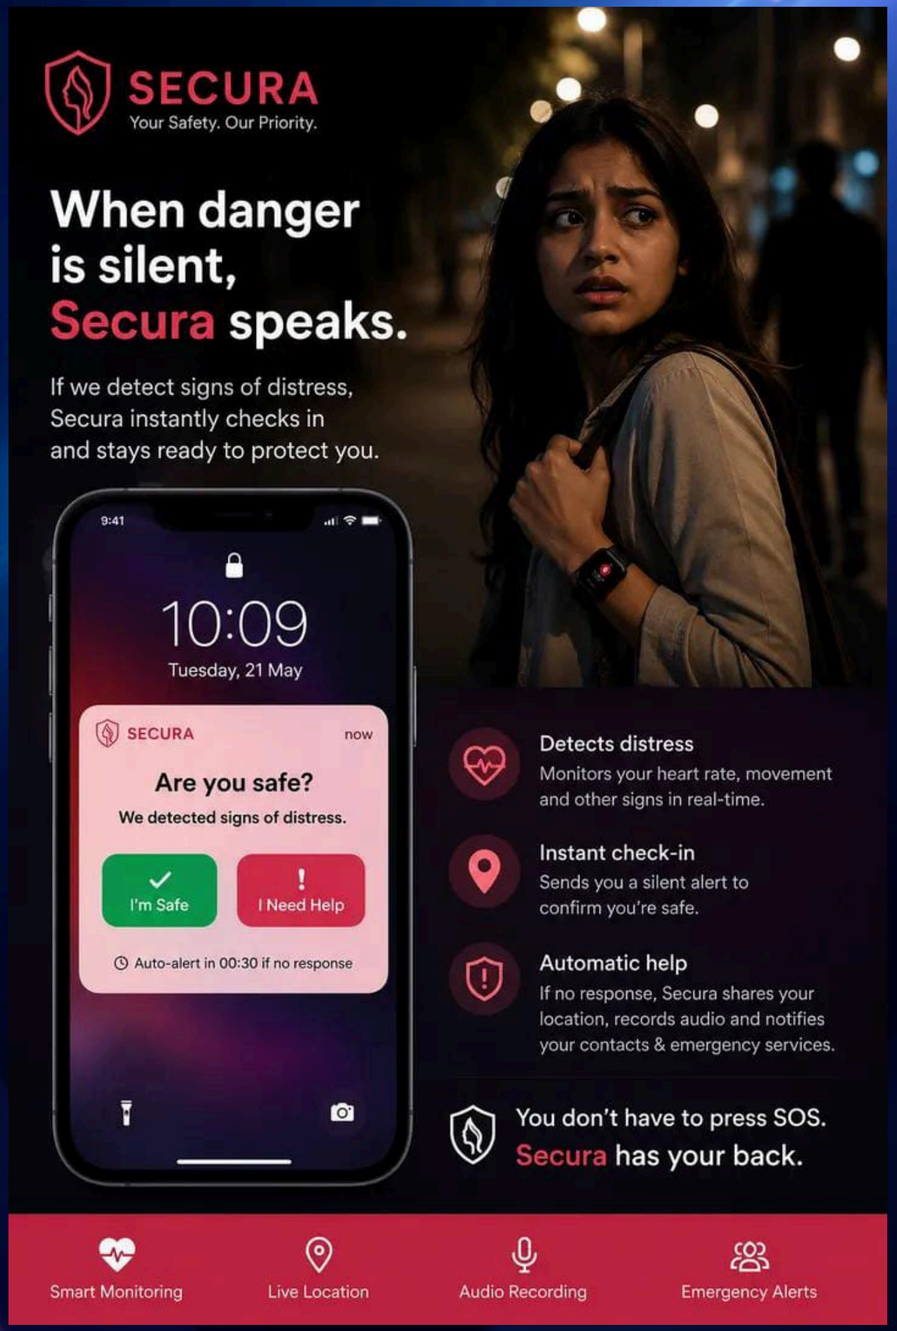
Women across the world, especially in public spaces, often face harassment, stalking, assault, and other emergencies. In many dangerous situations, victims may not have enough time or freedom to unlock their phone and manually press an SOS button. Current emergency apps depend heavily on the user taking action during moments of fear or panic. This delay can cost valuable time when immediate help is needed.

There is a need for an intelligent safety system that can recognise signs of distress automatically while still minimising false alarms.

Empowering Women Through SECURA Technology

INNOVATIVE SOLUTION

Secura is an AI-powered women's safety application that works with smartphones and smartwatches.
Instead of waiting for the user to manually request help, Secura continuously monitors physiological and behavioural indicators that may suggest the user is in distress.



HOW IT WORKS?

POSSIBLE INDICATORS INCLUDE:

PHYSIOLOGICAL

- SUDDEN INCREASE IN HEART RATE
- ELEVATED PULSE COMPARED TO THE USER'S NORMAL BASELINE MOVEMENT
- SUDDEN SPRINTING OR UNUSUALLY HIGH STEP FREQUENCY
- ABRUPT CHANGES IN WALKING SPEED
- SUDDEN STOP AFTER RAPID MOVEMENT
- FALL DETECTION (IF SUPPORTED BY THE DEVICE)

PHONE SENSORS:

- VIOLENT SHAKING DETECTED BY ACCELEROMETER
- SUDDEN UNUSUAL MOVEMENT
- GPS SHOWING RAPID UNEXPECTED ROUTE DEVIATION (OPTIONAL)

WHEN MULTIPLE INDICATORS SUGGEST DANGER:

1. THE APP VIBRATES.
2. A SILENT NOTIFICATION APPEARS:
"ARE YOU SAFE?"
3. USER CAN TAP

YES

NEED HELP

IF THE USER DOES NOT RESPOND WITHIN A SHORT PERIOD:

- EMERGENCY CONTACTS RECEIVE THE FOLLOWING MESSAGES:
  - LIVE GPS LOCATION
  - TIME OF ALERT
  - USER'S BATTERY PERCENTAGE
- AUDIO RECORDING BEGINS (WHERE PERMITTED BY DEVICE PERMISSIONS).
- EMERGENCY CONTACTS RECEIVE PERIODIC LOCATION UPDATES UNTIL THE ALERT IS RESOLVED.
- IN CASE OF NO INTERNET CONNECTION, USERS WILL RECEIVE AN OFFLINE SMS.

THIS LAYERED APPROACH AIMS TO REDUCE FALSE ALARMS WHILE STILL RESPONDING QUICKLY WHEN THE USER CANNOT ACCESS THEIR PHONE.

SECURA

Your Safety. Our Priority.

Smart Monitoring. Instant Protection.

Secura uses advanced sensors and intelligent AI to detect signs of distress and gets help to you—automatically.

WHAT WE MONITOR

- **Heart Rate** — Sudden increase in heart rate
- **Movement Patterns** — Sudden running, unusual activity
- **Steps per Minute** — Abnormal step frequency
- **Phone Movement** — Violent shaking or impact
- **Location Change** — Unexpected route deviation
- **Fall Detection** — Detects sudden falls

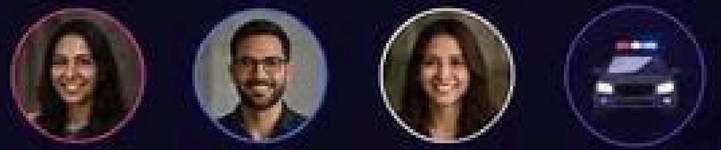
*Works with smartphone & smartwatch

HOW SECURA PROTECTS YOU

1. **Detects Signs**
   AI analyzes multiple signals in real-time.
2. **Checks on You**
   Sends a silent alert to confirm you're safe.
3. **No Response?**
   If you don't respond in time, Secura takes action.
4. **Gets You Help**
   Instantly shares your location, records audio & notifies emergency contacts.

ALERT SENT

Live Location · Audio Recording · Emergency Contacts · Police Alert



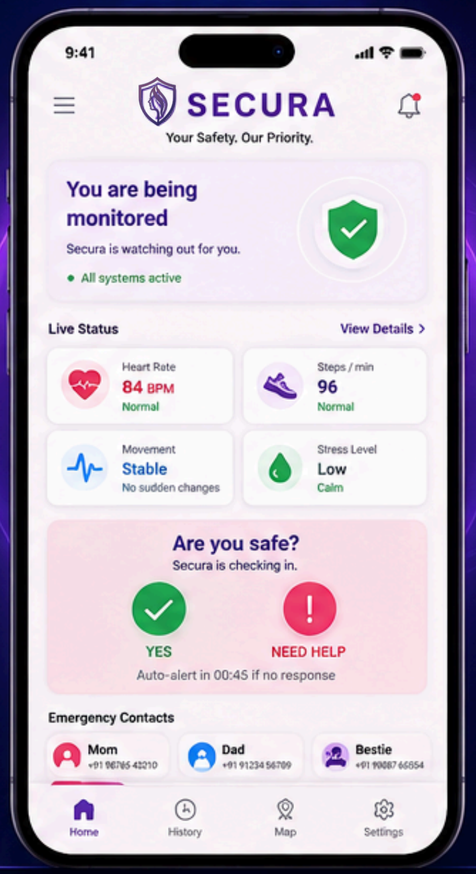
Your safety is our mission.
Secura is always watching over you.

- **Private & Secure** — Your data stays protected.
- **Battery Efficient** — Works in the background smartly.
- **Smartwatch Support** — Real-time alerts on your wrist.
- **Works Offline** — Sends SMS alerts even without internet.

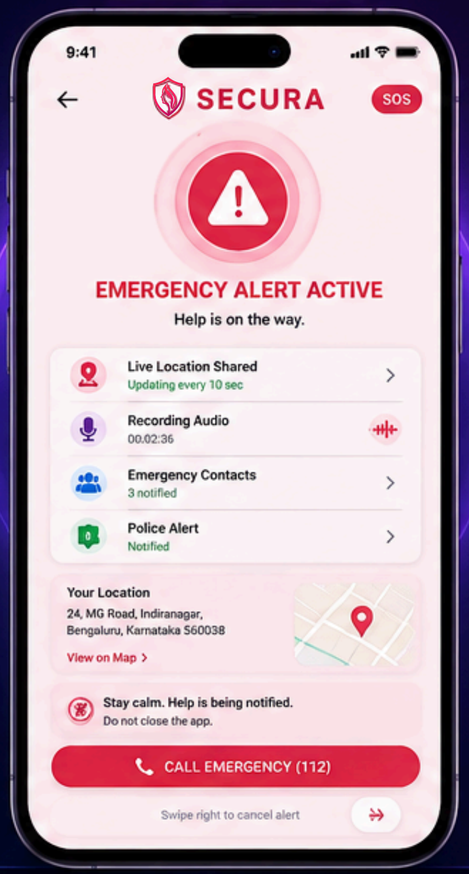
APP INTERFACE

Your Safety. Our Priority.

Home Screen



Emergency Alert



Live Tracking
Real-time location sharing

Health Monitoring
Track your vitals and activity

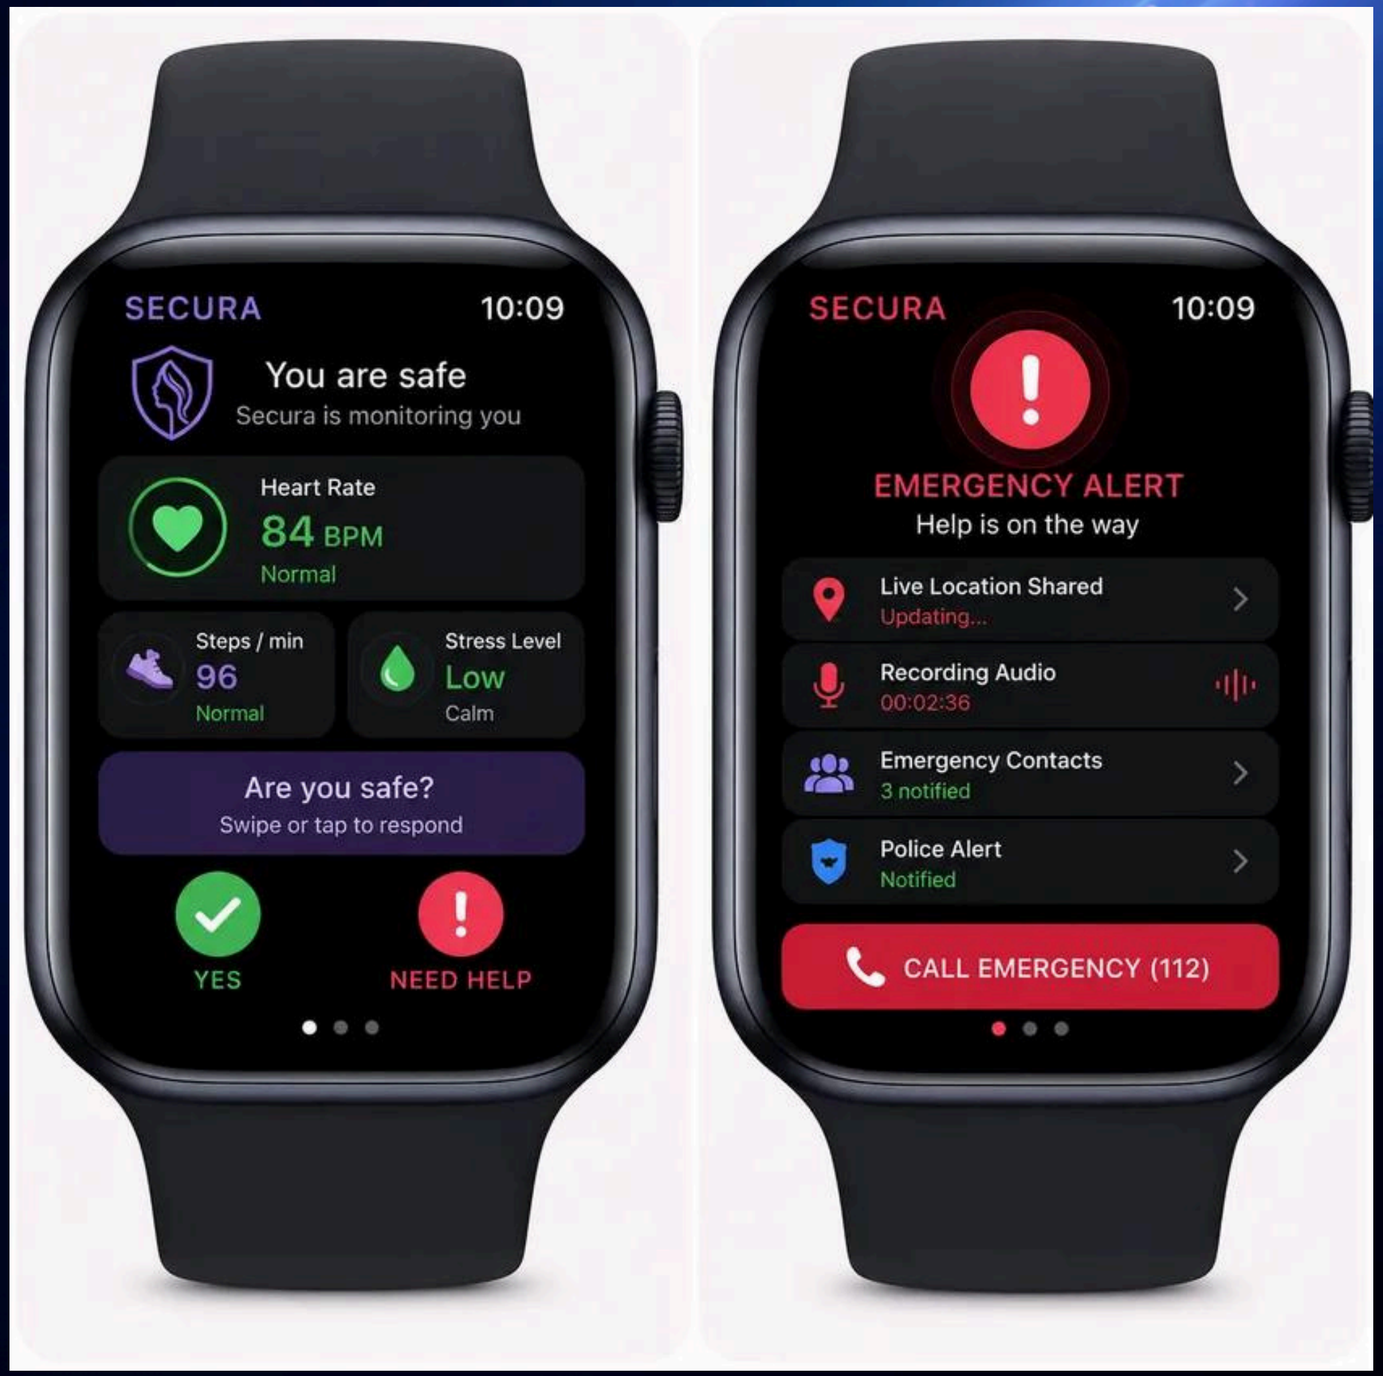
Instant SOS
One tap alert in emergencies

Audio Recording
Record and send audio instantly

Emergency Contacts
Notify your saved contacts

Smart monitoring with instant emergency response and real-time safety tracking.

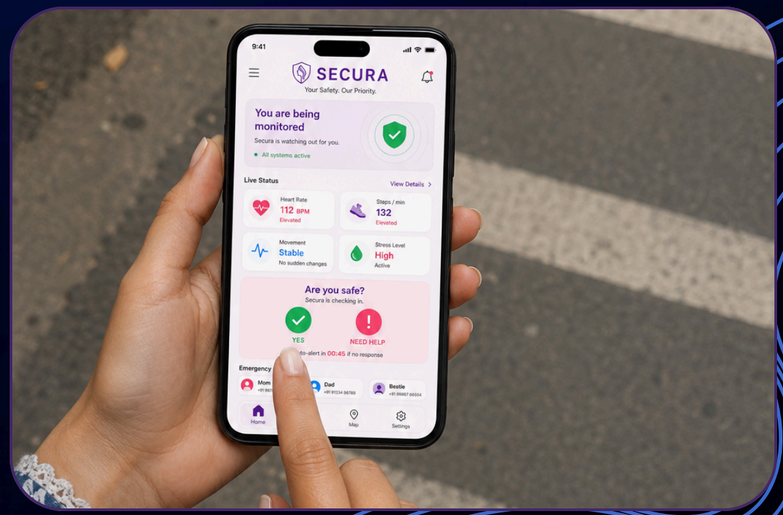
Secura Smartwatch interface



USER EXPERIENCE FLOW

Securians: Always One Tap Away from Safety

SECURA is designed with user-centric principles, ensuring that every interaction is intuitive and empowering, making women's safety accessible at their fingertips. A quick safety check-in lets Securians confirm their well-being with a single tap on "Yes" or instantly request emergency assistance by tapping "Need Help."



Where can it be used?

- Public transport
- Colleges
- Schools
- Workplaces
- Late-night travel
- Ride-sharing
- Walking alone

WHO BENEFITS?

Primary Users

- Women
- College Students
- School Students
- Working Professionals
- Night-Shift Employees
- Travelers

Secondary Users

- Parents
- Families
- Friends
- Law Enforcement Agencies (through emergency reporting where supported).

FUTURE VISION: EXPANDING SECURA'S IMPACT

- AI detects screams or keywords like "Help!"
- Voice activation using a secret phrase
- Safe Route recommendations based on crime statistics (if available)
- Offline SMS alerts when internet is unavailable

SECURA:

Revolutionizing Women's Safety

Transforming Women's Safety
