PROBLEM :- We Throw plastics all around the places which causes the environmental imbala-nce or disturbence.

Solution :- When someone is disposing or dumping dusts or plastics one can create a center in where people will give away the dust or plastics and they get something in return. for example :- A person is dumping some 5kg of dust or plastics so when they give it to the center where plastics or dust will be taken and They will get something in return like money, groceries. which may be helpfull for those who are poor or the people may be throwing it here and there when we use this idea may be people will reduce throwing it on public places or any places.

TITLE :- SASTA MAAL, BADA DHAMAAKa.

Meaning :- Less efforts, Large Profit
