LOOK INTO

- NAME :- Prince Rathore
- Class :- 8th CBSE
- Mobile no:- 9743200298 / 8884259923
- Problem Statement :- At night time many bus drivers, lorry drivers, and car drivers have the danger of accident whenever they sleep it can cause accidents not only in hilly region everywhere This the big problem for drivers.
- Solution :- If we have any cameras like which continously concentrate on the eyes of the driver whenever the driver closes his eyes more than 3 to 4 seconds the alarm starts ringing. the steering of vehicle becomes stiff and the brake is applied so the vehicle stops there itself so it is safe for drivers at night no tension of accident now it is prevented

Beneficiary :- It is benefit for bus drivers who drive bus at night and who loves tour at night it is safer you can be tension free from accidents at night if it small car it is only rings in very low volume
