• paint box attached with brush". look into the (13) Selected.

01. In India The Painters are struggling and from they take 3 - 5 days to paint a home.

02. My solution is for painters.

03. Solution → Take one long ~~stick~~ pipe & short ~~stick~~ pipe.
Take one square type box and ~~fix~~ the middle to the near of roller brush. The roller brush it must should be above the square box. Put any colour paint to the square box and fix the to the pipe. Fairst you take the short pipe ~~or~~ fix in the top. & Tag on thick thread and tag in the top.

04. Use full for Painters

Thank You
