Problem :- connetion Problem in Moto gp & new to new state or visitors

By Building AI assistant ~~the~~ in Helmet that tell us about road Map, traffic signal, the assistant gives information about upcoming road, obstracks, signal of ~~any~~ road accident and information from Home if any problem occurs this is in india it is very good for any new member to new state or country.

This we can apply on moto GP in moto gp they need to contact through their coaches by bluthoot or earphones but by improving more we can put a perfect trained ai assistat of moto gp race which gives advice to racer & give visual Hologram of race track and tactics to cross or bend bike
