Problem

In desert areas the ~~houses are~~ walls of the houses will be upstraight and the hot air comes in easily. And we feel hot.

Solution

We can put some blocks in which it contains fans which makes the hot air as cool air and we can feel cool.

Problem.

In the desert areas the nights will be so cold.

Solution.

The fans which we put to the walls of the houses will make the cool air as hot air and hot air can be made cool air.

Problem : Desert houses experience extreme daytime heat and night time cold due to thin, upright walls that easily ambient air in

Solution : Integrate specialised wall-mounted blocks combining fans to regulate indoor temperature by converting incoming hot air into cool air and vice versa

Idea title : Wall-mounted Fan desert climate blocks
