* Problem :- All the people are facing difficulty in visiting hospitals on a regular basis.

* Solution :- Health ATM.

A structure similar to ATM, that allows people to get their medical tests without visiting the doctor or even the involvement of doctors. It can be placed in every community, bus station and other crowded places. The whole machine relies on a weighing scale. The machine also consists a plastic clips which measures our BP, oxygen level etc ... So, if there's any problem in the report it directly sends to our phone and advises us to consult a doctor.

problem :- people are facing difficulty to visited hospital.

Solution :- Health ATM. like allows people to get their medical tests without visiting doctor

end user :- people.
