problem:- While parents at home are busy doing their chores, they do not give attention to kids

Solution :- Give a device to kid, when the kid cries it should give alarm or when something is happening to the kid, it should give alarm also add camera to that device, so that parents can monitor.

Problem : Busy parents occupied with household chores often struggle to continously monitor young children

Solution: A monitoring device equipped with sound-detection for crying or unusual activity & a live video camera feed, enabling parents to instantly detect and respond to child
