Idea name - Safty after 6:00

Selected.

Problem :

So nowadays basically parents are scared to send their daughters outside not only at night even after 6:00 or 5:00. Why this ~~is~~ is happening is because in few roads or areas there are few street lights or ~~no~~ none street ~~f~~ lights and no people walking around.

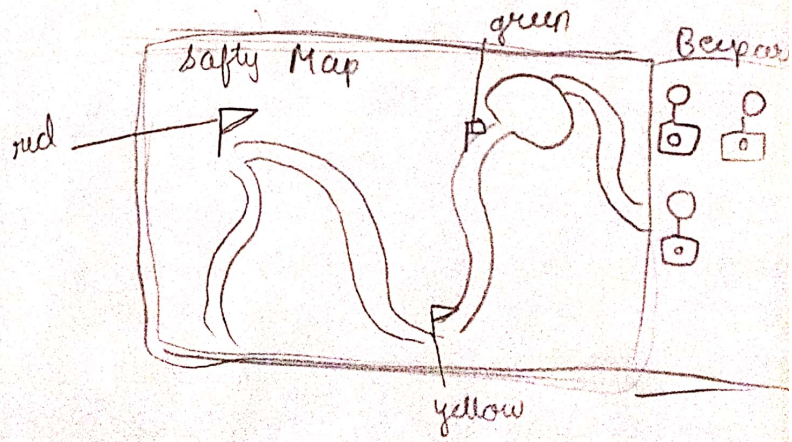

Solution :

For this problem in each locality or area ~~the~~ we can install a banner or a board of that areas or localities map which has it's roads with green, red and yellow flags or ~~led lights~~ LED lights. ~~which shows~~ which shows the ~~wom~~ one who walks by ~~to~~ that the road safe for ~~walking~~ or to go by other route. Red = no lights, no people or not safe

Yellow = few lights and few people may go in group.

green = safe to go ~~allow~~ alone.

Nexct ~~of~~ to that we can place a ~~bord~~ board contains beepers ~~keychains~~ which are in the form of normal keychains for the people who in yellow or red ~~roads~~ flag roads and if they are in danger or fell unsafe can press the button which will alert the ~~people~~ around them.
